MONROE COUNTY PUBLIC DEFENDER'S OFFICE

Present:
DEFENDING AGAINST DNA AND SCIENTIFIC EVIDENCE
11 CLE Credit Hours in Skills and 1 CLE Credit Hour in Ethics

December 3 – 4, 2010.
SUNY BROCKPORT CAMPUS
PROGRAM BROCHURE AND REGISTRATION INFORMATION TO FOLLOW

A new \$30 million dollar Crime Lab is scheduled to open in Summer 2011 which will triple the current lab in size and staff, and is expected to include new technologies in forensic evidence and expanded DNA analysis. Evidence such as DNA, computer forensics, and ballistic toolmark analysis are just a few of the types of evidence criminal defense lawyers will be seeing with increasing frequency. Attorneys must learn about these developing technologies and the ways in which they can effectively be challenged in order to provide quality representation.

The *Defending Against DNA and Scientific Evidence Seminar* will provide a thorough and comprehensive coverage of all aspects of preparing for DNA and other types of forensic analysis. Speakers from the DNA Diagnostics Center in Fairfield, Ohio will lecture for two hours on the scientific principles of DNA. This scientific foundation is the base from which the remainder of the program is built. Local attorneys will be joined by lecturers from New York City who will give presentations on a wide range of topics including what motions to file, how to cross experts, and how to defend cold cases. The program will also include guidance on how to pick a jury when a case involves DNA and present ideas to use in developing opening statements and closing arguments in these types of cases.
